JLDBB Self-Esteem Promotion/Suicide Prevention Youth Suicide Prevention

Purpose: To establish the board’s vision for the district’s suicide awareness and prevention programs.

The board recognizes the serious problem of youth suicide and acknowledges that youth suicide is a complex issue which cannot be addressed by the district and schools alone. Suicide is a major killer of young people between the ages of 10 and 24. However, the district staff, students and parents/legal guardians all can contribute significantly towards the prevention of adolescent youth suicide. Therefore, the board directs the superintendent to consider each of these segments of the school community when developing appropriate awareness and prevention programs in the district.

The district will use a variety of resources from the Department of Mental Health, South Carolina Department of Education, and suicide prevention organizations to help school personnel to do the following:

Local mental health agencies and training guidelines from the South Carolina Department of Education are resources that can provide the necessary assistance that will help the district staff, parents/legal guardians and students to do the following:

- Understand the developmental stages of adolescence.
- Understand how feelings of depression and despair can lead to suicide.
- Recognize the early warning signs of suicide.
- Learn how to help in a suicidal crisis.
- Identify school and community resources where youth teenagers can get help.
- Address the impact of such a tragedy.

The superintendent will ensure implementation of the required training in this area for the renewal of credentials for individuals employed in a middle or high school.

Adopted 7/1/03; Revised 9/24/13.
